Press Release

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

**It must be remembered that the United States is a Colonialist Country; surrendering to her Tariff Policies will endanger the Nation's Sovereignty!**

The United States, a global peddler of capitalism, has unleashed a 'tariff storm' worldwide, disregarding the principles of free market economy—one of capitalism's core philosophies—and the rules and regulations of the so-called World Trade Organization (WTO) it created. This once again proves that the capitalist system is inhumane and exploitative. Bangladesh's interim government has adopted a submissive policy in response to the U.S. tariff measures. They have already made suicidal decision to purchase 25 expensive Boeing aircraft, along with importing cotton and LNG from the United States, even though many countries are canceling their orders due to Boeing's poor performance. And they are holding one-on-one meetings with the United States, keeping the public in the dark through a historic 'non-disclosure agreement' (NDA). The reason is that the country's aware citizens, sincere politicians, and intellectuals know that the U.S. wants to use Bangladesh as a geopolitical pawn and is desperate to implement its colonialist projects in this region. Allah ﷻ says: **“And if they gain dominance over you, they would be your enemies, and they will unleash their hands and tongues to harm you...”** [Surah Al-Mumtahina: 02]

Capitalist economists, despite their knowledge of political economy, are so naive that they view the US tariff policy only from an economic perspective and fail to find any solution beyond economic measures to counter them. The Americans would have received a befitting response if the interim government had evicted American companies from Bangladesh's energy sector as a response to this inhumane US tariff policy. Yet, this issue has not even been considered in the calculation of the U.S.-Bangladesh trade deficit. The power-hungry BNP has deceived the people by promising full cooperation to the government in dealing with US tariffs. While the United States is extending her domination over Bangladesh, some have not hesitated to gift Jamdani sarees to American diplomats. On behalf of **Hizb ut Tahrir**, we warn the interim government: the U.S. is a Colonialist Country, refrain from entering into any agreement with it that is against the country's interests. Instead, this opportunity must be used to avoid all forms of dependency, including trade, on the United States.

**O People**, politically aware individuals know that the United States has repeatedly pushed the global economy into recession due to her Capitalist Colonialist policies. Now she has declared a trade war to establish her its unilateral control over the world. The unilateral trade policies and new tariffs of the US pose a threat to global trade [Dr. Moazzem, Research Director, CPD]. Now, surely, the 'utopia' of the free market economy has been exposed to the contemporary economists.

Only the Khilafah (Caliphate) system will make the country economically self-reliant, and replace the economic policies dependent on FDI (Foreign Direct Investment). It will uproot the U.S. Colonialist institutions like the IMF and the World Bank from this country and establish a leading economy based on Islam, and bring the world under the shade of a just and balanced economy. You know that **Hizb ut Tahrir** has previously presented the manifesto of the Caliphate's leading economic policies at various local and international conferences. Therefore, unite with **Hizb ut Tahrir**'s sincere and visionary leadership and move forward to establish the Caliphate. Allah ﷻ says:

﴿وَلَوْ أَنَّ أَهْلَ الْقُرَىٰ آمَنُوا وَاتَّقَوْا لَفَتَحْنَا عَلَيْهِم بَرَكَاتٍ مِّنَ السَّمَاءِ وَالْأَرْضِ وَلَكِن كَذَّبُوا فَأَخَذْنَاهُم بِمَا كَانُوا يَكْسِبُونَ﴾

**“And if only the people of the lands had believed and feared Allah, We would have overwhelmed them with blessings from heaven and earth.”** [Surah Al-A'raf: 96]
